IBTIHEL BLIDAOUI

Full-Stack Developer | Software Engineering Student

Kebili, Tunisia | +216 99 985 908 | blidaouiibtihel22@gmail.com | linkedin.com/in/ibtihel-blidaoui | github.com/blidaoui

SUMMARY

Software Engineering student specializing in full-stack web development and scalable application design. Hands-on experience building responsive applications with JavaScript, Python, Next.js, React, NestJS, Node.js, PostgreSQL, and MySQL. Recently completed a contact-free, gesture- and voice-controlled control system as a final-year capstone project, alongside coursework in web application security testing. Strong foundation in software architecture, API development, and Agile teamwork, with a focus on user experience, clean code, and practical problem-solving.

SKILLS

Languages: Python, Dart, Java, JavaScript, TypeScript, SQL, C/C++, PHP, HTML, CSS

Frameworks & Libraries: React, Flutter, Next.js, NestJS, Node.js, Tailwind CSS

Databases & Platforms: MySQL, PostgreSQL, Firebase

Security & Tools: SQLMap, Burp Suite (fundamentals), vulnerability assessment, Git/GitHub, Eclipse, VS Code

Methodologies: Agile/Scrum, REST API design, code review

EXPERIENCE

Full-Stack Developer Intern — AURES Group *02/2024 – 05/2024*

Kebili, Tunisia

- Designed and built a full-stack click-and-collect restaurant ordering platform covering menu browsing, online payment, and real-time delivery tracking.
- Developed the frontend in Next.js and a scalable REST API in NestJS backend by PostgreSQL, supporting the complete order life cycle from cart to checkout.

Full-Stack Developer Intern — AURES Group *07/2023 – 08/2023*

Kebili, Tunisia

- Built a responsive To-Do List app using React and Node.js with client-side state management and RESTful APIs.
- Contributed front-end and back-end features on internal projects, including UI components and API endpoints.

PROJECTS

HAOR — Hands-Free Assistant for Room Operations *Final Year Capstone Project*

Contact-free surgical control system using gesture and voice recognition

- Designed and developed a contact-free control system enabling surgical staff to operate operating-room equipment via real-time gesture and voice recognition, combining computer vision and speech recognition as control signals.

Blind SQL Injection Security Assessment *Cybersecurity Coursework*

SQLMap-based penetration test on a self-hosted WAMP environment

- Conducted a Blind SQL Injection penetration test against a self-hosted WAMP environment using SQLMap, then documented attack methodology and real exploitation results in a professional security report.
- Identified and remediated the vulnerability by implementing parameterized queries and input validation, closing the attack vector.

EDUCATION

ESSAT — Degree in Software Engineering *09/2024 – Present*

École Supérieure des Sciences Appliquées et de la Technologie Privée de Gabès — Gabès, Tunisia

ISIMG — Bachelor's Degree in Computer Science *09/2021 – 06/2024*

Institut Supérieur d'Informatique et Multimédia de Gabès — Gabès, Tunisia
